

What Subject do Students in Year 3 and 4 Prefer at School?

Aim:

Our aim is to survey students in year 3 and 4 at Dubbo South Public School to see what subject they would prefer to do during class time.

Hypothesis:

We think that the most popular subject in school would be sports because students are mostly inside all day and they like going outside for a change.

Equipment:

- 1 clipboards
- A pen/pencil
- Survey sheet
- A poster with all the subjects students can choose from

Method:

1. Print the survey sheet.
2. Using the survey sheet ask students in year 3 and 4 what subject they would prefer to do at school.
3. Make a graph and see what subject is more popular.

Conclusion:

We surveyed 185 students and found out that 88 students liked Sports the most. Our hypothesis was correct.
