

# Finding Out The Most Common Bird At Our School

Aim: To identify the most common bird at school.

Hypothesis: We think the most common bird will be the Noisy Miner, and the Australian Magpie.

Equipment: Pen, Paper, Aussie Bird Count App.

## Method:

1. Go outside and spend twenty minutes standing or sitting in the one spot, noting down the birds you see.
2. Download the Aussie Bird Count app and insert your data.
3. Four different surveys were taken during school hours, which is included in our survey.

## My Statistics

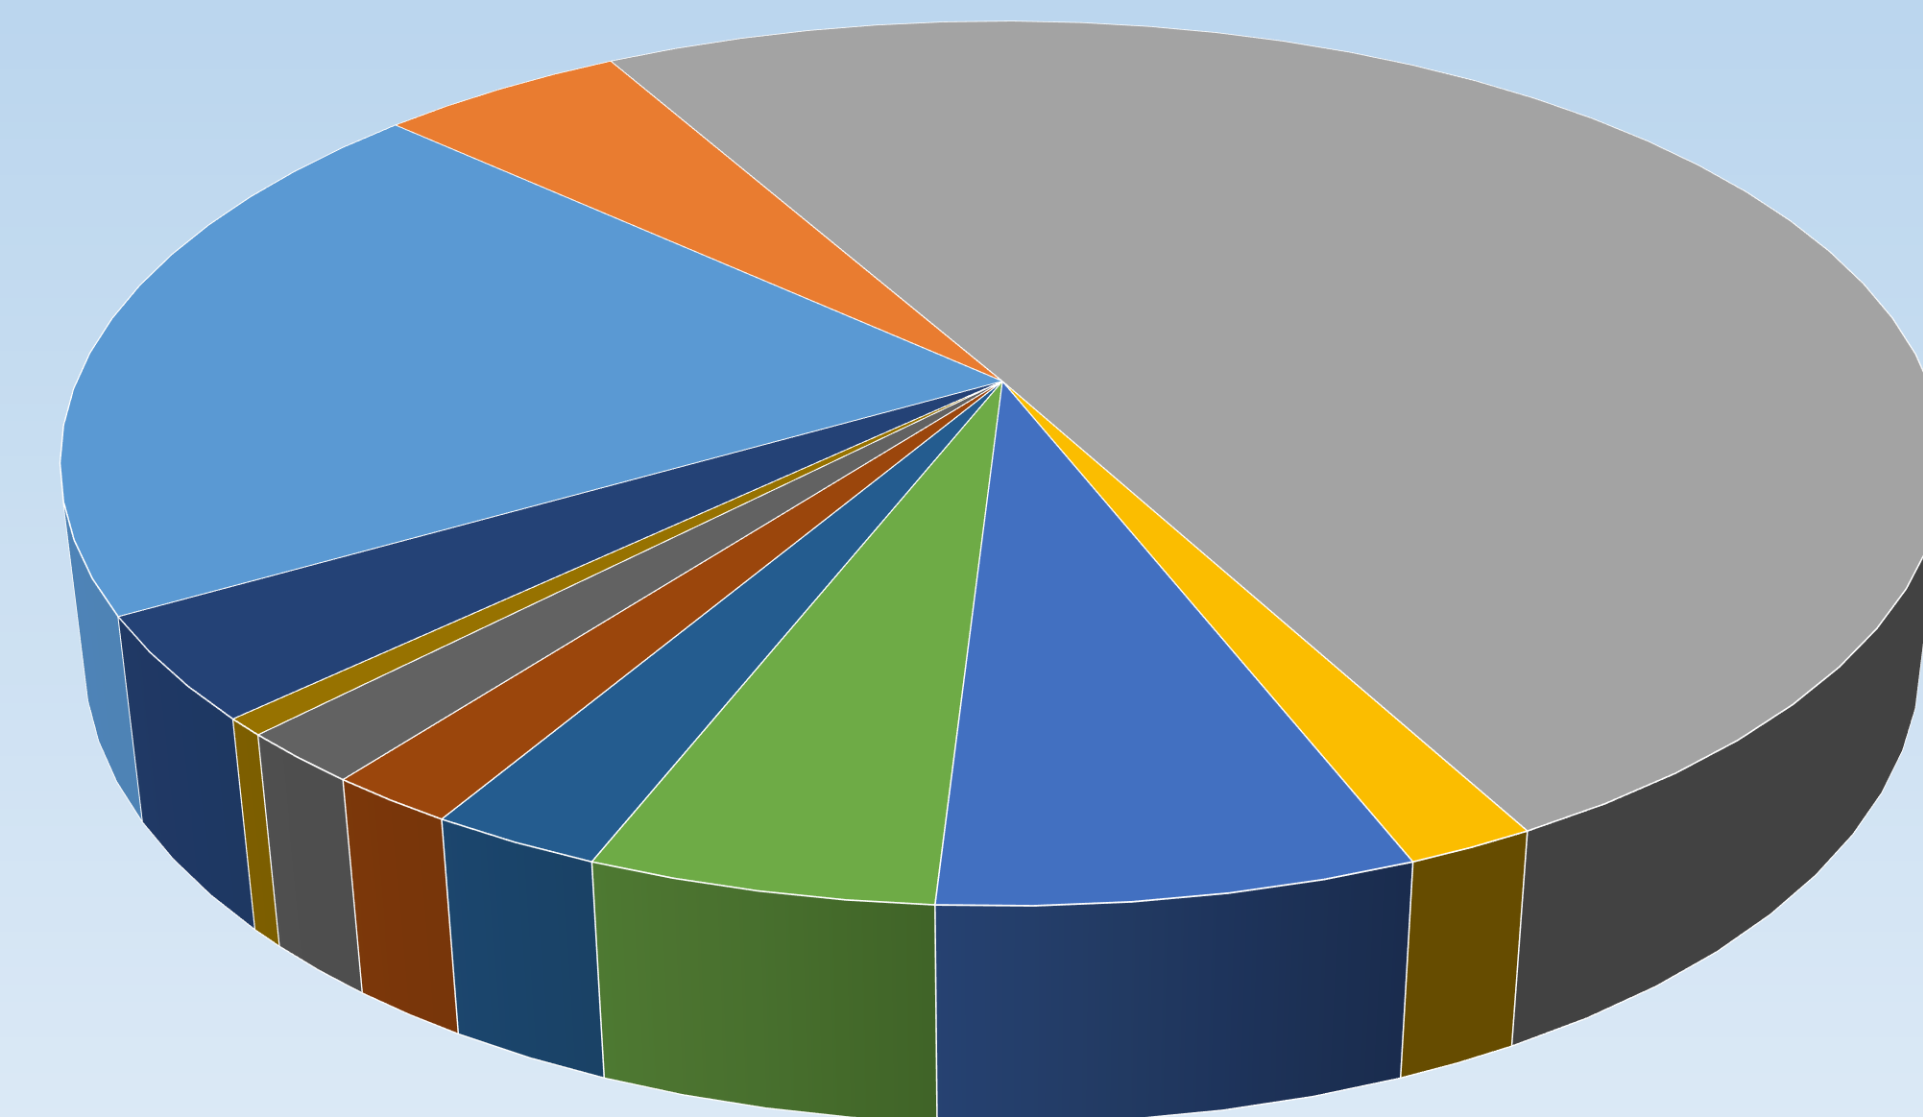

Checklists submitted	1
Species sighted	8
Birds sighted	34

Showing statistics for Parsons.Lauren.M@edumail.vic.gov.au. [Change](#)

## Bird Species Seen

 <b>Australian Magpie</b> Cracticus tibicen Birds sighted: 10	 <b>Common Blackbird</b> Turdus merula Birds sighted: 1	 <b>Crested Pigeon</b> Ocyphaps lophotes Birds sighted: 1
 <b>Galah</b> Eolophus roseicapillus Birds sighted: 6	 <b>Little Raven</b> Corvus mellori Birds sighted: 2	 <b>Noisy Miner</b> Manorina melanocephala Birds sighted: 10
 <b>Pied Currawong</b> Strepera graculina Birds sighted: 2	 <b>Rainbow Lorikeet</b> Trichoglossus moluccanus Birds sighted: 2	

Number Of Birds Sighted

- Australian Magpie
- Gang Gang Cockatoo
- Noisy Miner
- Common Blackbird
- Little Raven
- Rainbow Lorikeet
- Common Myna
- Pied Currawong
- Rock Dove
- Crested Pigeon
- Galah

Conclusion: Our hypothesis was correct because there were 80 Noisy Miners and 32 Australian Magpies, and these were the most common species we observed.
