

WHAT'S YOUR FAVOURITE PAST TIME?

Aim:

To investigate what past time is the most popular.

Equipment:

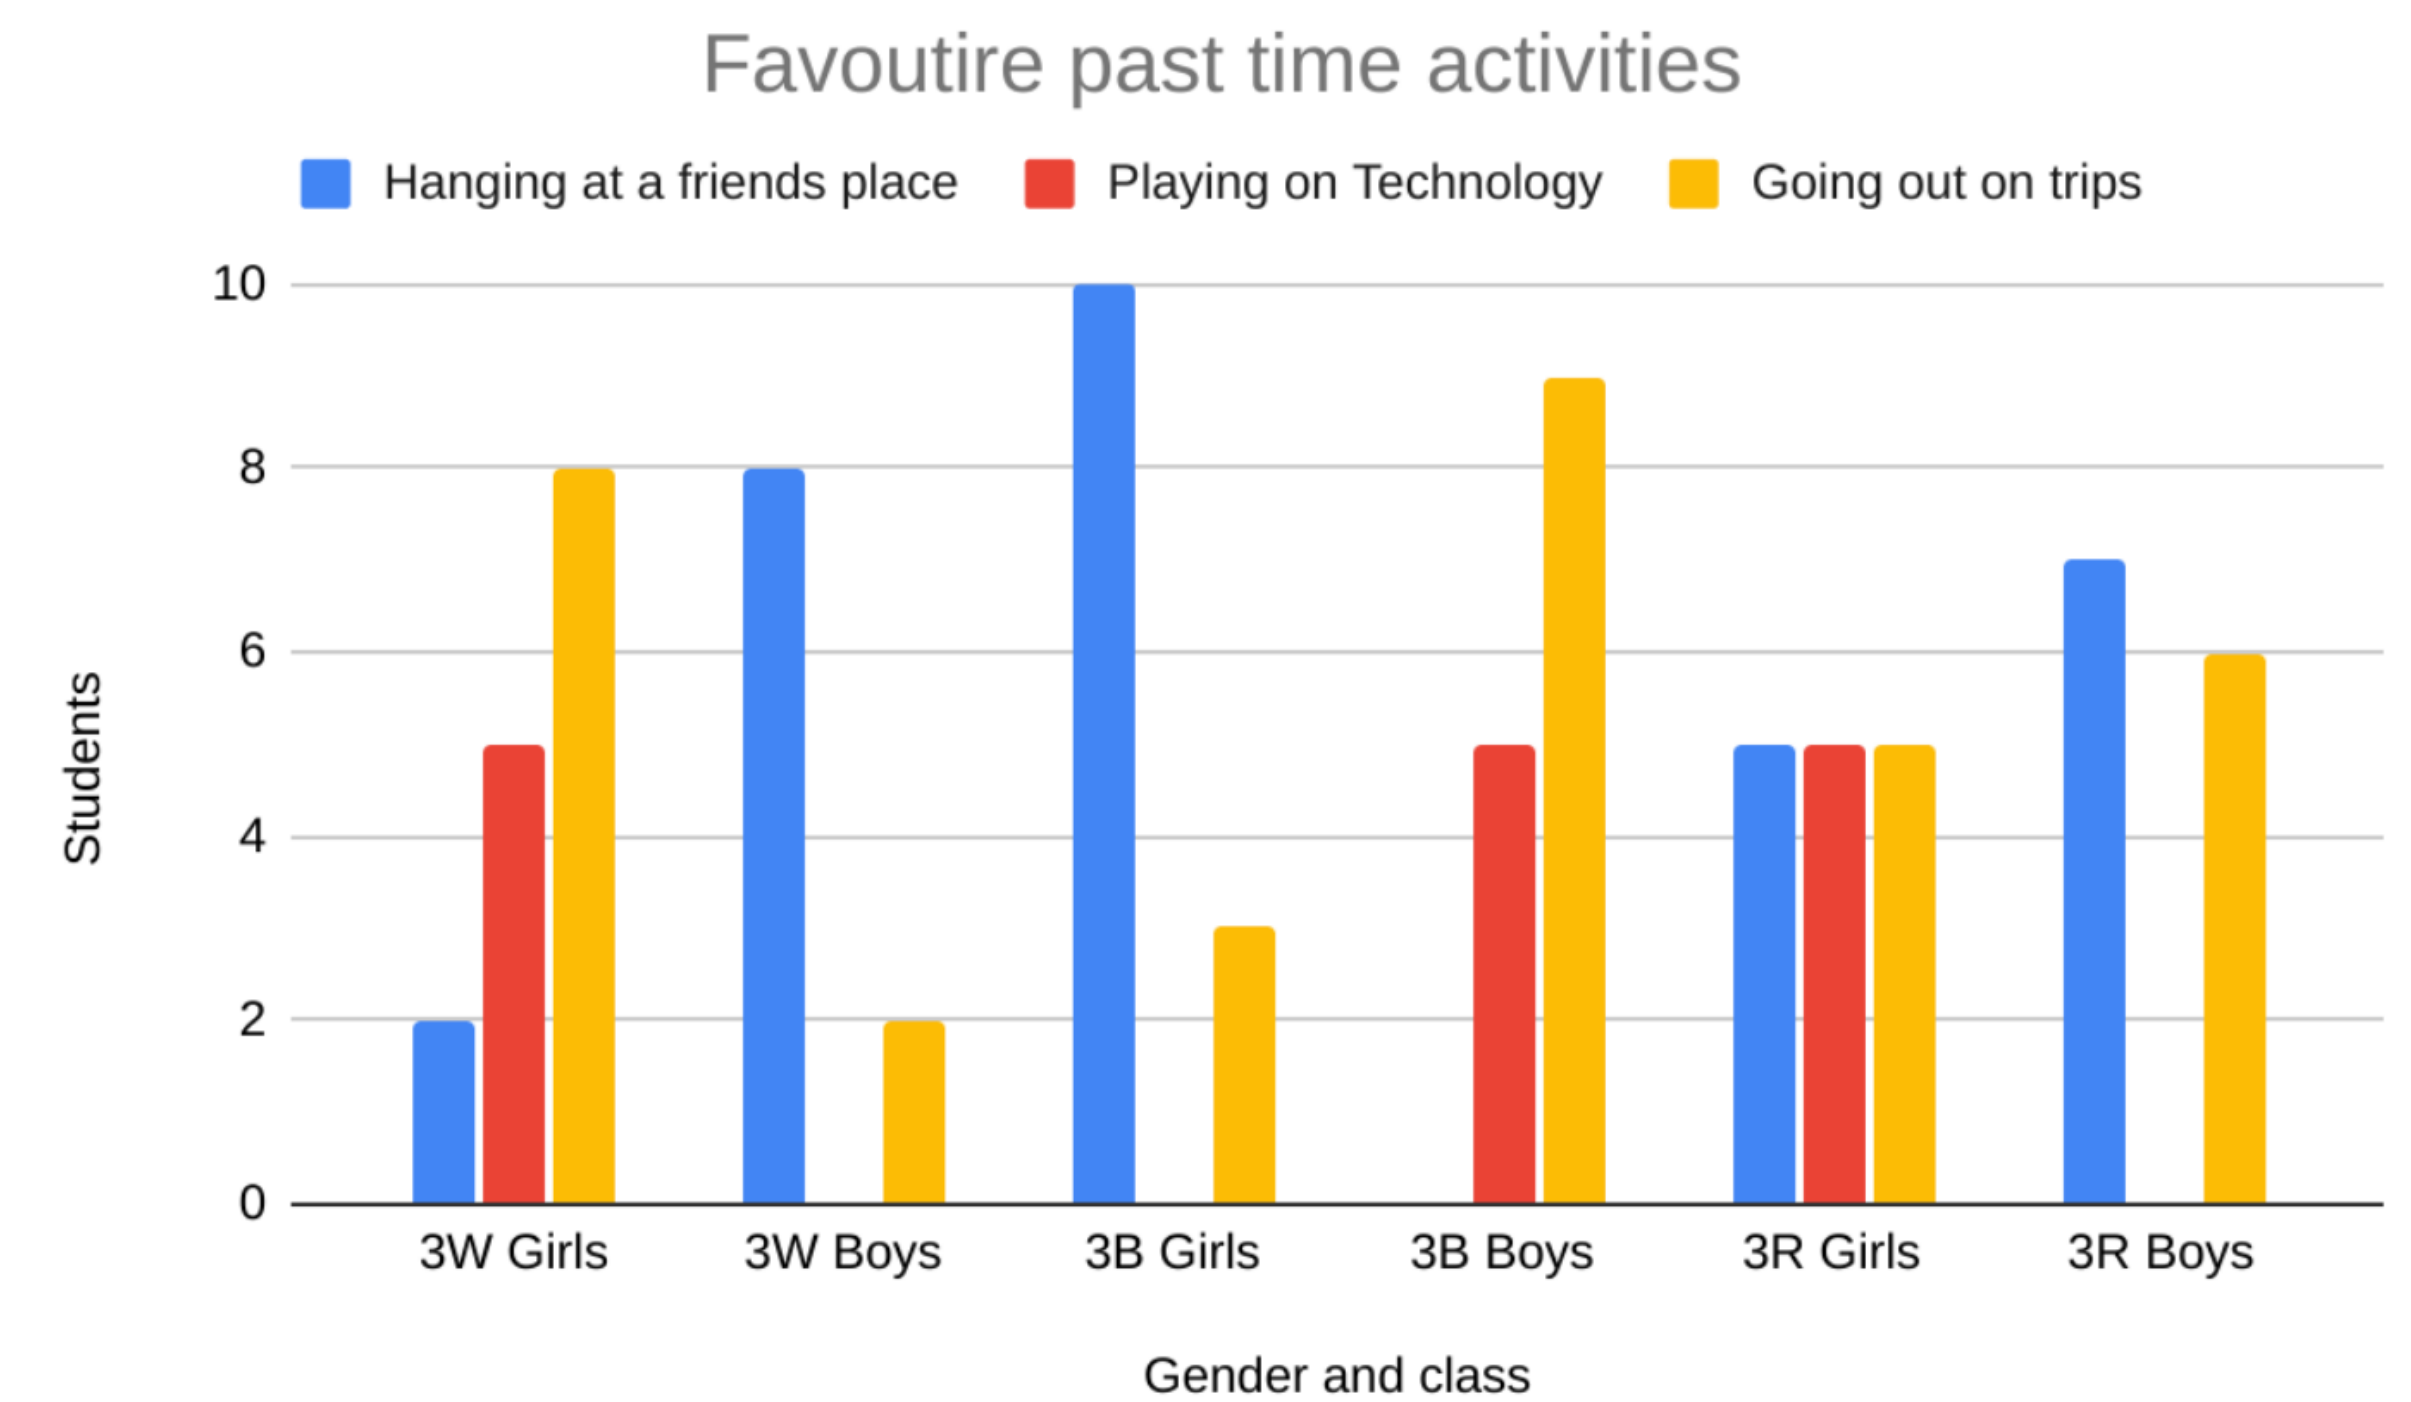

- Pencil
- Survey Sheet
- Chromebook

Method:

Ask each student in Year 3 'What is your favourite past time?'

Hypothesis:

We hypothesise that technology will be the most popular past time because a lot of people use technology for entertainment. We hypothesise that hanging out with friends will be the least popular past time.

Analysis:

From the results, our first hypothesis was incorrect. The most popular past time students chose was hanging out with their friends.
